IGNITIONS AND ELECTRICAL › WIRING HARNESSES › FULL WIRING HARNESS

IGNITION WIRING HARNESS

Weatherpack · Single Ignition Box / Quickcar Switch Panels

PART NUMBER
QRP50-2033

OVERVIEW

A modified running a single ignition box has a predictable set of connections, and building that harness by hand takes hours and invites mistakes. This plug-and-play harness makes the whole ignition system a connect-and-go job. Built as a universal harness for UMP and IMCA modifieds, it links the ignition box, distributor, QuickCar switch panel, coil, starter solenoid, and tachometer, with Weatherpacked connections throughout.

Sold as harness only.

Note: For Northeast Mod Wiring Harness: See part number 50-2038.

SPECIFICATIONS

Terminal Style	**Weatherpack**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**11.15 × 7.55 × 1.95 in**
Ship Weight	**0.8 lb**
Country of Origin	**USA**
