IGNITION WIRING HARNESS

Weatherpack · Single Ignition Box / Quickcar Switch Panels · Asphalt Late Model

PART NUMBER
QRP50-2053

OVERVIEW

Asphalt late model rules leave little room for improvised wiring, and tech lines move faster when the harness is a known quantity. This serial numbered spec harness is built to satisfy most asphalt late model series out of the box. Constructed of Tefzel mil-spec wire with gold-plated ring terminals and weatherproof connectors, it is plug-and-play for FAST 6700-6701 and JMS Daytona Sensors 6000-6701k ignition boxes and many QuickCar switch panels.

A 3-pin Deutsch distributor lead comes standard.

SPECIFICATIONS

Terminal Style	**Weatherpack**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**15.1 × 8.05 × 2.1 in**
Ship Weight	**0.7 lb**
