IGNITION BOX

6CT · Digital · CD Ignition · Multi-Spark · 45000V · Rev Limiter · Mounting Panel / Coil Ignition Included

PART NUMBER
QRP50-213

OVERVIEW

Sourcing an ignition box, a matching coil, and a way to mount both is three separate decisions and three chances to end up with parts that do not fit together. This kit settles all three at once. An MSD 6427 box and 8252 coil come mounted on an aluminum plate with the coil lead pre-installed, using the same slotted bolt pattern as other QuickCar ignition box options.

It connects directly to the 50-2053 late model spec harness and is legal under United Late Model Rules Alliance rules.

SPECIFICATIONS

Volts	**45000V**
Digital Or Analog	**Digital**
Notes	**Uses MSD 8252 ignition coil**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**16.4 × 10.6 × 6.85 in**
Ship Weight	**8.37 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
