PUSH BUTTON SWITCH

Starter · Momentary · 35 amps · 12V · Panel Included

PART NUMBER
QRP50-433

OVERVIEW

QuickCar Push Button Switches are the standard way to engage a starter solenoid, and a momentary button keeps the circuit live only while it is pressed. That is exactly what you want on a starting circuit. This remote mount version pairs a 35 Amp, 12 Volt push-to-start button with a black plate and comes wired for connection to the starter solenoid, letting the engine be rolled over from the engine compartment.

Ideal for setting valve lash without reaching into the cockpit.

SPECIFICATIONS

Style	**Push Button / Momentary**
Amps	**35 Amps**
Volts	**12V**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**5.6 × 5.5 × 5.2 in**
