SWITCH WIRING HARNESS

Toggle · Off / On / Momentary · Safety Cover

PART NUMBER
QRP50-507

OVERVIEW

Starting a car takes two switches working together, and wiring them as separate purchases invites mismatched parts and extra splices. This kit combines the pair into one pre-wired unit. It includes a 50-506 ignition switch, a 50-201 HEI wiring harness for direct integration with HEI systems, and a 50-501 flip cover that allows a fast shutoff while guarding against accidental bumps.
