PUSH BUTTON SWITCH

Starter · Momentary · 35 amps · 12V

PART NUMBER
QRP50-510

OVERVIEW

QuickCar Push Button Switches are the standard way to engage a starter solenoid, and a momentary button keeps the circuit live only while it is pressed. That is exactly what you want on a starting circuit. This is the same push-to-start button pre-wired into many QuickCar switch panels, sold on its own.

It fits a 5/8 Inch inside diameter mounting hole and works with both 12 Volt and 16 Volt systems.
