# WARNING LIGHT

LED · 12V · 1/2 in Diameter · Red · Quickcar Switch Panels

PART NUMBER  
**QRP50-601**

## OVERVIEW

A switch that has been thrown is easy to confirm on the grid and easy to forget under pressure. An indicator light over the switch answers the question without the driver looking away from the track. This red lens LED fits a 1/2 Inch inside diameter hole and includes positive and negative hookups.

Sold individually, it is the same light used in several QuickCar switch panels.
