IGNITIONS AND ELECTRICAL › WIRING COMPONENTS › SHRINK SLEEVE TUBING

SHRINK SLEEVE TUBING

Labeled · Ignition Harness · Set of 8

PART NUMBER
QRP50-705

OVERVIEW

Six months after a car is wired, nobody remembers which unlabeled wire goes where. Labelled heat shrink solves that at the moment of assembly for almost no cost. This eight-piece kit includes pre-labeled shrink for switch panel, gauge panel, ground, master switch, distributor, tachometer, solenoid, and coil, sealing each connection against moisture and contaminants as it identifies it.

SPECIFICATIONS

Sold As	**Kit**
