# IGNITION BOX BRACKET

Aluminum · Natural

PART NUMBER
**QRP50-810**

## OVERVIEW

An ignition box bolted up with whatever hardware was on the bench costs real time when it has to come off in the pits. QuickCar mounting plates give the box a dedicated, repeatable home on any flat surface. This adapter plate mounts an MSD ignition box and coil together and removes the need to cut the MSD magnetic pickup wires when converting a primary ignition system.

## SPECIFICATIONS
