CIRCUIT BREAKER

20 amps · Resettable

PART NUMBER
QRP50-9720

OVERVIEW

QuickCar Circuit Breakers provide dependable overcurrent protection for electrical accessories and circuits in racing, performance, and custom vehicles. When excessive current caused by an overload, short circuit, or damaged wiring exceeds the breaker's rated capacity, the breaker interrupts the circuit to help protect wiring and connected electrical components from damage. Unlike a conventional fuse that must be replaced after opening the circuit, the resettable breaker design allows circuit protection to be restored after the electrical problem has been identified and corrected.

Well suited for accessory circuits and other wiring exposed to the demanding conditions of competition vehicles, QuickCar Circuit Breakers provide a convenient, serviceable layer of protection for critical vehicle electrical systems.

SPECIFICATIONS

Amps	**20 Amps**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**4.2 × 3 × 0.65 in**
Ship Weight	**0.07 lb**
Country of Origin	**USA**
Vehicle Type	**Car**

ALSO AVAILABLE IN THIS FAMILY (4 PART NUMBERS)

PART #	AMPS	SHIP WT.
QRP50-9715	15 Amps	0.07 lb
