TREAD DEPTH GAUGE

0.001 in to .500 in Depth · Mechanical · Digital · Aluminum Base

PART NUMBER
QRP56-102

OVERVIEW

Tread depth tells the crew what the tire actually did on track, and eyeballing it wastes the information. A digital gauge makes the reading exact enough to act on. It measures to 0.001 Inch and displays in decimals or fractions, on a non-rocking billet aluminum base that sits flat on the tread.

Useful for dialing camber ahead of longer races.
