TIRE TEMPERATURE GAUGE

Digital · Harness / Sensor

PART NUMBER
QRP56-200

OVERVIEW

Tire temperature is the most direct feedback a crew gets about whether the setup is working, but readings taken minutes after the car stops are already wrong. This kit measures in real time. The sensor mounts near a tire on the car and reports live temperatures with peak recall for tracking maximums.

It works with 12 Volt and 16 Volt systems and includes all necessary mounting hardware.

SPECIFICATIONS

Digital Or Analog	**Digital**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**6 × 5.5 × 5.5 in**
Ship Weight	**0.57 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
