BATTERY CABLE

Race Wire · 2 Gauge · 125 ft · Copper · Black

PART NUMBER
QRP57-104

OVERVIEW

QuickCar Battery Cable provides a dependable, high-capacity electrical path for battery, starter, grounding, and other high-current connections in racing and performance vehicles. Fine-stranded copper construction promotes efficient power flow while providing the flexibility needed to route heavy-gauge cable through tight chassis, engine compartment, and battery locations without making installation unnecessarily difficult. Durable insulation helps protect the conductor in high-temperature automotive environments, while the flexible construction makes the cable easier to position and secure throughout custom electrical systems.

Ideal for race car wiring, battery relocation, chassis fabrication, repairs, and complete electrical builds, QuickCar Battery Cable provides the combination of conductivity, flexibility, and durability needed for reliable high-current power distribution.

SPECIFICATIONS

Size	**125 Foot**
Color	**Black**
Style	**Race Wire**
Gauge	**2 Gauge**
Material	**Copper**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**18 × 12.55 × 12.2 in**
Ship Weight	**35.41 lb**
Country of Origin	**USA**
Vehicle Type	**Car**

ALSO AVAILABLE IN THIS FAMILY (6 PART NUMBERS)

PART #	SIZE	COLOR	SOLD AS	SHIP WT.
QRP57-102	125 Foot	Red	Each	40.2 lb
