ALTERNATOR WIRE HARNESS

Disconnect Included · Diode / Terminals / Boots · Universal

PART NUMBER
QRP57-105

OVERVIEW

An alternator feed carries real current, and a hand-built lead with the wrong gauge or an unprotected terminal is a fire waiting to happen. These universal kits arrive with the wire, terminals, and boot needed to do the job properly. Rated at 50 Amp, this kit includes 9 Foot of 8 gauge wire with ring terminals, a boot, and quick disconnects, so the alternator can be unplugged without cutting anything.
