ALTERNATOR WIRE HARNESS

Quick Disconnect · 9 ft Wire · Waterproof · Terminals Included

PART NUMBER
QRP57-107

OVERVIEW

An alternator feed carries real current, and a hand-built lead with the wrong gauge or an unprotected terminal is a fire waiting to happen. These universal kits arrive with the wire, terminals, and boot needed to do the job properly. Rated at 60 Amp, this kit includes 9 Foot of 8 gauge wire with ring terminals, a boot, and waterproof 1-pin Deutsch connectors for a sealed disconnect.
