BATTERY CABLE CONNECTOR

Quick Connect Plug · 50 amps · 12V · 4 Gauge · Polycarbonate · Gray

PART NUMBER
QRP57-706

OVERVIEW

Swapping a battery should take seconds, not a socket set. QuickCar Battery Quick Disconnects put a proper connector on both ends of the cable, so batteries and chargers come on and off without unbolting anything. All required connectors are included.

A 2-pin connector for 4 gauge cable, rated at 120 Amp. Most teams run three: one on the battery end, one on the car end, and one on a spare battery or charger.
