RELAY SWITCH

40 amps · 12V · Universal

PART NUMBER
QRP57-750

OVERVIEW

A relay lets a small switch control a large load, which keeps heavy current out of the dash and off the driver's fingers. This compact modular unit is the general-purpose building block for that. Rated for 12 Volt use and supplied with a bracket, it suits lighting, starting, horn, heating, and cooling or fan control circuits.

SPECIFICATIONS

Amps	**40 Amps**
Volts	**12V**
Sold As	**Each**

SHIPPING & PACKAGING
