BRAKE BIAS GAUGE

Dual Gauge · 0-1000 psi · Mechanical · Analog · 1-1/2 in Diameter · White Face · Vertical Panel · Aluminum

PART NUMBER
QRP61-101

OVERVIEW

QuickCar Dual Brake Bias Gauges provide a clear way to compare front and rear brake system pressure, giving racers valuable information for evaluating and adjusting brake balance. By displaying pressure from both brake circuits simultaneously, the gauges make it easier to see how braking force is being distributed and verify the effect of brake bias adjustments during vehicle setup. Liquid-filled gauges help provide stable, readable pressure indications in the vibration-prone environment of a competition vehicle, while the compact panel keeps both readings conveniently positioned together for quick comparison.

Ideal for race car setup, brake system testing, and troubleshooting, QuickCar Dual Brake Bias Gauges help turn brake balance into measurable information that can be used to create a more consistent and predictable braking setup.

SPECIFICATIONS

Diameter	**1-1/2 Inch**
PSI	**0-1000 PSI**
Style	**Mechanical**
Shape	**Vertical**
Digital Or Analog	**Analog**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**5.75 × 5.55 × 5.5 in**
Ship Weight	**0.85 lb**
Country of Origin	**USA**
Vehicle Type	**Car**

ALSO AVAILABLE IN THIS FAMILY (2 PART NUMBERS)

PART #	SHAPE	SHIP WT.
▶ **QRP61-101**	**Vertical**	**0.85 lb**
QRP61-103	Horizontal	0.86 lb

▶ Highlighted row is the part on this sheet.
