BRAKE BIAS GAUGE

Dual Gauge · 0-1000 psi · Mechanical · Analog · 1-1/2 in Diameter · White Face · Horizontal Panel · Aluminum

PART NUMBER
QRP61-103

OVERVIEW

QuickCar Dual Brake Bias Gauges provide a clear way to compare front and rear brake system pressure, giving racers valuable information for evaluating and adjusting brake balance. By displaying pressure from both brake circuits simultaneously, the gauges make it easier to see how braking force is being distributed and verify the effect of brake bias adjustments during vehicle setup. Liquid-filled gauges help provide stable, readable pressure indications in the vibration-prone environment of a competition vehicle, while the compact panel keeps both readings conveniently positioned together for quick comparison.

Ideal for race car setup, brake system testing, and troubleshooting, QuickCar Dual Brake Bias Gauges help turn brake balance into measurable information that can be used to create a more consistent and predictable braking setup.

SPECIFICATIONS

Diameter	1-1/2 Inch
PSI	0-1000 PSI
Style	Mechanical
Shape	Horizontal
Digital Or Analog	Analog
Sold As	Kit

SHIPPING & PACKAGING

Package	5.8 × 5.45 × 5.25 in
Ship Weight	0.86 lb
Country of Origin	USA
Vehicle Type	Car

ALSO AVAILABLE IN THIS FAMILY (2 PART NUMBERS)

PART #	SHAPE	SHIP WT.
QRP61-101	Vertical	0.85 lb
► QRP61-103	Horizontal	0.86 lb

► Highlighted row is the part on this sheet.
