WATER PRESSURE GAUGE

0-35 psi · Mechanical · Analog · Full Sweep · 2-1/16 in Diameter · White Face · Warning Light

PART NUMBER
QRP61-716

OVERVIEW

Water pressure falling off is often the first sign of a cooling problem, and a warning light catches it even when the driver is not looking at the gauge.

This kit pairs a 2-1/16 Inch diameter mechanical water pressure gauge reading 0-35 PSI with a blue warning light, a sending unit that activates when water pressure drops below 4 PSI, and a brass in-line tee. It is similar to kit 61-713 but includes the Legend Series water pressure gauge.

SPECIFICATIONS

Application	**Water Pressure**
