GAUGE MOUNTING GROMMET

Offset 3/4 in Toward Driver · 2-3/4 Mounting Hole · Rubber · Black · 2-5/8 in Gauges

PART NUMBER
QRP61-727

OVERVIEW

Saddle brackets hold a gauge rigidly, which means every bit of chassis vibration goes straight into the needle. A shock ring isolates the gauge instead, and the reading settles down enough to trust at speed. This grommet secures 2-5/8 Inch diameter gauges into a mounting panel and offsets them toward the driver for better visibility.

Sold each.
