# WATER TEMPERATURE GAUGE

140-280 Degree F · Mechanical · Analog · Full Sweep · 2-5/8 in Diameter · Silver Face

PART NUMBER
**QRP611-6006**

## OVERVIEW

A gauge you have to study is a gauge that gets ignored at speed. QuickCar Legend Series gauges keep it simple: a clean analog face, a bright pointer and LED backlighting, sold individually so a panel can be built or repaired one gauge at a time.

This 2-5/8 Inch mechanical water temperature gauge reads a 140-280 Degree F range and has a 6 Foot capillary tube and a brass 1/2 Inch NPT adapter for installing it in the intake. The recommended sending unit is 61-740, and the complete 61-712 Water Temperature Kit adds the sending unit, warning light and pre-terminated wiring.

Note: Sending units sold separately. For the 611-6006 Water Temperature gauge, the corresponding sending unit recommended is Pt.# 61-740. Also, we offer a complete Water Temperature Kit to go along with this gauge (Pt.# 61-712) that includes sending unit, warning light, and pre terminated wiring for easy installation.
