TORQUE LINK BUSHING

2-1/8 in OD · Various Hardness · Color Coded · Urethane · Black / Blue / Red / Yellow

PART NUMBER
QRP66-508

OVERVIEW

QuickCar Torque Link Bushings provide racers with a simple, effective way to tune torque absorber response for changing track conditions, vehicle setup, and driver preference. By controlling how the torque absorber reacts as power is applied, these bushings help manage drivetrain loading and suspension response to improve forward bite and maintain traction during acceleration. Different bushing hardnesses allow the torque absorber's progressive rate to be adjusted, giving racers another valuable chassis-tuning tool as track conditions evolve throughout an event.

Ideal for replacement, maintenance, or fine-tuning an existing setup, QuickCar Torque Link Bushings make it easier to tailor power delivery and traction characteristics without replacing the complete torque absorber assembly.

SPECIFICATIONS

Color	**Black / Blue / Red / Yellow**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**11.05 × 8 × 1.6 in**
Ship Weight	**1.3 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
