SUSPENSION TUBE WRENCH

Double End · 5/8 in and 3/4 in Tube · Steel · Zinc Oxide · QuickCar Scalloped Suspension Tubes

PART NUMBER
QRP66-6275

OVERVIEW

QuickCar's Double-End Suspension Tube Wrench provides a fast, convenient way to make chassis and suspension adjustments using QuickCar scalloped aluminum suspension tubes. Designed specifically to engage the tube's scalloped profile, the wrench provides a secure grip for turning the tube during setup changes, making it easier to fine-tune suspension geometry without struggling with makeshift tools. The double-ended design accommodates both 5/8-inch and 3/4-inch QuickCar suspension tubes, allowing one compact tool to service two commonly used tube sizes.

Heavy-duty steel construction provides the strength and durability needed for repeated use in the shop, pits, or race trailer. Purpose-built for QuickCar's adjustable suspension components, this wrench helps make setup changes quicker, cleaner, and more convenient when every adjustment counts.

SPECIFICATIONS

Material	**Steel**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**6.85 × 6.15 × 0.65 in**
Ship Weight	**0.43 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
