

GAUGES AND ACCESSORIES > INDIVIDUAL GAUGES > DIGITAL GAUGES

LAP TIMER

Quick Timer · 2-1/16 in Diameter · Digital Display · LED Indicator Lights · Black Face

PART NUMBER
QRP67-107

OVERVIEW

QuickCar Digital Series gauges trade a sweeping needle for a bright digital readout, so a driver reads an exact number at a glance instead of interpreting pointer position at speed. Each 2-1/16 Inch gauge is built in a lightweight plastic case sized for standard gauge openings and QuickCar panels. This GPS equipped gauge compares each completed lap to the one before it, showing a green light with the time gained on a faster lap and a red light with the time lost on a slower one.

A driver can try a different line and have the answer at the next start-finish crossing without waiting on crew communication, on road courses, circle track, or anywhere the car crosses the same point each lap.

SPECIFICATIONS

Diameter	2-1/16 Inch
Sold As	Kit

SHIPPING & PACKAGING

Package	5.6 × 4.6 × 4.05 in
Ship Weight	0.62 lb
Country of Origin	USA
Vehicle Type	Car
