OIL TEMPERATURE GAUGE

Redline · 140-320 Degree F · Electric · Analog · Full Sweep · 2-5/8 in Diameter · Black Face

PART NUMBER
QRP69-009

OVERVIEW

An electric gauge does not need a fluid line run to the dash. QuickCar Redline Series 2-5/8 Inch gauges use a reliable electric stepper motor in a lightweight plastic case, and an adjustable warning level changes the backlighting color and flashes when a reading needs attention.

This gauge reads oil temperature on a 140-320 Degree F range, and its warning function switches the backlighting from white to orange/amber and flashes when temperature rises above the set level. Sending unit 63-225 is sold separately and is required for the gauge to work.
